20037

INTRODUCTION.

THIS volume, illustrative of Victorian Plants, has been issued separately from the descriptive portion of the work, with a view of rendering the plates independently available for study, and of adding to their number as occasions in future may arise. The explanatory notes appended to each table may suffice to convey to the observer an outline of the principal characters of those species, and many of the discriminative marks of genera and orders, which these lithograms are intended to unfold. The issue of the describing pages of the work, for which the material is partly prepared and partly prearranged, has been temporarily deferred, in order that precedence of publication may be given to the corresponding volumes on the universal empire of plants of Australia, emanating in London from the President of the Linnean Society, under the aid of the Melbourne phytologic establishment; by which arrangement the opportunities will be afforded to consult the views adopted by that illustrious and veteran phytographer for the general arrangement and special limitation of the plants of all Australia, as comprehensively compared with those hitherto known from any other parts of the globe, and as resting on identifications of species formerly but imperfectly circumscribed.

CONTENTS.

| | Plate | | Plate |
|---|-------|--|-------|
| Acacia Mitchelli, Benth. (Suppl. Plate) ... | 12 | Myriogyne Cunninghamsi, Cand. ... | 41 |
| pravissima, F. M. ... | 24 | Myrsine variabilis, R. Br. ... | 53 |
| Antennaria nubigena, F. M. ... | 45 | Notelaea ligustrina, Vent. ... | 54 |
| Bauera sessiliflora, F. M. ... | 16 | Panax dendroides, F. M. ... | 28 |
| Bertya oleifolia, Planch. ... | 20 | Persoonia Caley, R. Br. ... | 69 |
| Boerhaavia mutabilis, R. Br. ... | 67 | Plantago stellaris, F. M. ... | 66 |
| Calotis cymbacantha, F. M. ... | 36 | Polycalymma Stuartii, Sond. & Muell. ... | 42 |
| Cassia platypoda, R. Br. ... | 25 | Polypompholyx exigua, F. M. ... | 64 |
| Cassinia paniculata, Behr & Muell. ... | 43 | Pomaderris biaurita, F. M. ... | 22 |
| Cassytha glabella, R. Br. ... | 68 | Prostanthera spinosa, F. M. ... | 56 |
| Celastrus Australis, Harv. & Muell. ... | 21 | Psoralea acanthocarpa, F. M. ... | 26 |
| Conospermum patens, Schlechtend. ... | 70 | Pultenaea rosea, F. M. (Suppl. Plate) ... | 13 |
| Eclipta platyglossa, F. M. ... | 39 | Rhyncharrhena quinquepartita, F. M. ... | 59 |
| Elachothamnus Cunninghamsi, Cand. ... | 34 | Rubus macropodus, Ser. ... | 15 |
| Eremophila bignoniflora, F. M. ... | 55 | Sambucus xanthocarpa, F. M. ... | 29 |
| Ethuliopsis dioica, F. M. ... | 38 | Sebaea albidiflora, F. M. ... | 61 |
| Eucalyptus globulus, Lab. (Suppl. Plate) ... | 16 | Senecio vagus, F. M. ... | 46 |
| odorata, Behr. (Suppl. Plate) ... | 17 | Solanum vescum, F. M. ... | 62 |
| Eurybia astrotricha, F. M. ... | 33 | Solenogyne bellioides, Cass. ... | 37 |
| pannosa, Hook. ... | 32 | Stackhousia pulvinaris, F. M. ... | 14 |
| Galium geminifolium, F. M. ... | 31 | Statice Australis, Spreng. ... | 65 |
| Gingidium simplicifolium, F. M. ... | 27 | Stenanthera conostephoides, F. M. ... | 52 |
| Grevillea rigidissima, F. M. ... | 71 | Stylidium soboliferum, F. M. ... | 47 |
| Halgania andromedifolia, Behr & Muell. ... | 57 | Syzygium brachynemum, F. M. (Suppl. Plate) ... | 18 |
| Haloragis odontocarpa, F. M. ... | 17 | Tetragonia implexicoma, J. Hook. ... | 13 |
| Humea ozothamnoides, F. M. ... | 44 | Thryptomene Mitchelli, F. M. ... | 23 |
| Kippistia suædifolia, F. M. ... | 35 | Tillæa purpurata, J. Hook. ... | 19 |
| Leeuwenhoekia creberrima, F. M. ... | 48 | Trigonella suavissima, Lindl. (Suppl. Plate) ... | 15 |
| Lobelia purpurascens, R. Br. ... | 50 | Trineuron nivigenum, F. M. ... | 40 |
| Logania nuda, F. M. ... | 60 | Velleya connata, F. M. ... | 49 |
| Loranthus eucalyptoides, Cand. ... | 30 | Veronica densifolia, F. M. ... | 63 |
| Lyonsia straminea, R. Br. ... | 58 | Wittsteinia vacciniacea, F. M. ... | 51 |

P L A T E S.

TETRAGONIA IMPLEXICOMA.

J. Hook. Flor. Tasman. i. 148 ; F. M. Vegetation of the Chatham-Islands, 12 ; T. trigyna, Banks & Soland.
accord. to J. Hook. Handbook of the New Zealand Flora, 84.

PLATE XIII

Figure 1, a flower, expanded.

2, a flower in bud, opened.

3, vertical section of part of a flower.

4, anthers.

5, pollen-grains.

6, horizontal section of ovary.

7, stigmatose styles.

8, vertical section of fruit.

9, fruit seen from above.

10, horizontal section of fruit.

11, a three-seeded fruit seen from above.

12, horizontal sections of the same with and without the seeds.

13, seeds.

14, side-view of albumen and embryo in situ.

15, front-view of both.

16 & 17, crystalline epidermis.

STACKHOUSIA PULVINARIS.

F. M. in Transact. Phil. Soc. Vict. i. 101 ; Fragm. Phyt. Austr. iii. 88.

PLATE XIV.

Figure 1, a branch with a flower-bud.

2, a branch with an expanded flower.

3, corolla, laid open.

4, flower, the corolla removed.

5, stamens.

6, side-view of pollen-grains.

7, top-view of pollen-grains.

8, pistil.

9, young fruit.

10, carpels.

11, a carpel laid open.

12, vertical section of a carpel.

13, horizontal section of a carpel.

F. Mueller del. & lith.

Stackhousia pulvinaris. IV.

RUBUS PARVIFOLIUS.

Linneé, Spec. Plant. 707 ; Benth. Flor. Austral. ii. 430 ; *R. macropodus*, Seringe in Cand. Prodr. ii. 557 ;
F. M. Fragm. iv. 30.

PLATE XV.

Figure 1, flower during anthesis.

2, flower after anthesis.

3, petals.

4, stamens.

5, pollen-grains.

6, pistils and part of receptacle.

7, calyx, receptacle and two stamens.

8, ripe fruit.

9, a succulent and a shrivelled carpel laid open.

10, carpels after removal of the sarcocarp.

11, longitudinal section of one of the same.

12, latitudinal section of one of the same.

13 & 14, embryo.

BAUERA SESSILIFLORA.

F. M. in Transact. Phil. Soc. Vict. i. 41 ; in Hook. Kew Miscell. ix. 228 ; Fragn. Phyt. Austr. iv. 24.

PLATE XVI.

Figure 1, leaves.

2, diametrical line of a leaf.

3, side-view of a flower.

4, top-view of a flower.

5, part of calyx with the styles and a stamen.

6, stamens.

7, pollen-grains.

8, vertical section of ovary.

9, ovules.

Bauera sessiliflora. F. M.

HALORAGIS ODONTOCARPA.

F. M. Fragm. Phyt. Austr. i. 108 ; Benth. Flor. Austr. i. 479.

PLATE XVII.

Figure 1, side-view of a flower.

2, side-view of a fruit.

3, flower, viewed from above.

4, flower, in bud.

5, back-view of a petal.

6, front-view of a petal.

7, stamens.

8, pollen-grains.

9, transverse section of fruit.

10, longitudinal section of fruit.

11, seed.

12, section of seed, showing the embryo.

Cucumis Muelleri, Naudin in Annal. des Scienc. Natur. ser. iv. vol. ii. 84.

PLATE XVIII.

Figure 1, part of a tendril.

2, asperities of the epidermis.

3, male flower, seen from above.

4, male flower, seen from below.

5, front-view of anthers.

6, back-view of anthers.

7, pollen-grains.

8, female flower.

9, style and stigmata.

10, sections of fruit.

11, seeds.

12, 13 & 14, seeds dissected longitudinally and transversely.

TILLÆA PURPURATA.

J. Hooker in Lond. Journ. of Bot. vi. 472; Benth. Flor. Austr. ii. 451.

PLATE XIX.

Figure 1, a plant and single branch, much enlarged.

2, a flower expanded.

3, a flower, the carpels cut away.

4, petals.

5, stamens.

6, pollen-grains.

7, carpels, burst open.

8, a carpel, opened to exhibit the position of the seeds.

9, apex of seed.

10, side-view of seed.

11, longitudinal section of a seed.

12, transverse section of seed.

Ludwig J. K. Ker; del. F. Schoenfeld, lith.

V. Mueller direct.

Tillaea purpurata. J. Hook.

BERTYA GUMMIFERA.

Planchon in Lond. Journ. of Bot. iv. 473 ; *B. oleifolia*, Panch. l. c.

PLATE XX.

Figure 1, stellate hair of the indument.

2, involucre, surrounding a larger male flower and a smaller female flower, both in bud.

3, the same, with the flowers expanded.

4, a male flower, separated.

5, an involucre with a female flower, the male flower removed.

6, a female flower, laid open.

7, bracts, constituting the involucre, separated.

8, sepals.

9, stamens.

10, back-view of an anther.

11, front-view of a burst anther.

12, front-view of an anther before opening.

13, column of anthers.

14, pollen-grains.

15 & 16, fruits.

17, a division of a style.

18, a female flower cut lengthwise.

19, an ovary, opened to show the septa and the position of the ovules.

20, a fertile cell of the fruit.

21, transverse section of the fruit.

22, septa and valves of the fruit.

23 & 24, seeds.

25, basal extremity of the seed, exhibiting the arillus and part of the raphe.

26, longitudinal section of a seed, exhibiting albumen and embryo.

F. M. Fragm. Phyt. Austr. iii. 94 ; Benth. Flor. Austr. i. 399.

PLATE XXI.

Figure 1, part of branchlets, showing structure of epiphlæum.

- 2, a flower in bud.
- 3, side-view of an expanded flower.
- 4, top-view of an expanded flower.
- 5, a petal.
- 6, calyx laid open, to exhibit the insertion of the stamens on the disk, also the pistil.
- 7, side-view of stamens, disk and calyx.
- 8, disk, surrounded by the calyx, seen from above.
- 9, side-, back- and front-view of stamens.
- 10, pollen-grains.
- 11, side-view of capsule.
- 12, front-view of capsule.
- 13, capsule in age.
- 14-17, different forms and stages of capsule.
- 18, receptacle and placentæ.
- 19, fruit-valves.
- 20, horizontal section of ovary.
- 21, seeds.
- 22-24, sections of seeds.
- 25, embryo.
- 26, embryo, the cotyledons bent asunder and seen from their edge.

PLATE XXII.

Figure 1, stellate hair of the indument.

2, a branchlet, but little magnified.

3, bracts.

4, side-view of a flower.

5, top-view of a flower.

6, longitudinal section of part of a flower.

7, sepals.

8, stamens.

9, pollen-grains.

10, fruit, closed.

11, fruit, partly opened.

12, fruit, entirely opened.

13, receptacle, with the outer part corresponding to one of the carpels.

14, transverse section of fruit.

15, two separate carpels, one partly forced open.

16, section of endocarp.

17, a carpel viewed from the base.

18, a carpel viewed laterally.

19, seeds.

20, 21 & 22, sections of carpels.

- 3, a flower in bud.
- 4, a flower expanding.
- 5, a corolla, back-view.
- 6, a corolla, front-view.
- 7, a corolla, the lobes bent asunder to show the stamens and style.
- 8, lobes of corolla.
- 9, side-view of the smaller lobe of the corolla, with stamens and style.
- 10, pistil, with the adjacent small lobe of the corolla, and one of the larger lobes.
- 11, a lobe of the corolla, with a stamen attached.
- 12, front-view of a stamen.
- 13, back-view of a stamen.
- 14, side-view of a stamen.
- 15, pollen-grains.
- 16, calyx and pistil, after the lapse of the corolla.
- 17, pistil.
- 18, capsule, presenting its flat side.
- 19, capsule, presenting its edge.
- 20, capsule, bursting.
- 21 & 22, longitudinal sections of a capsule.
- 23, septum and seeds.
- 24, a seed.
- 25, longitudinal section of a seed.
- 26, transverse section of a seed.
- 27, side-view of an embryo.
- 28, front-view of an embryo.
